Agricultural and Forest Meteorology 69 (1994) 289–290

AGRICULTURAL AND FOREST METEOROLOGY

Contents of Volume 69, 1994

VOL. 69, NOS. 1–2 JUNE 1994

Special Issue: New Vision and New Perspectives in Agricultural Meteorology/Climatology and Modeling

Introduction and Summary

Future direction and needs in agricultural meteorology/climatology and modeling
S.E. Hollinger 1

Research Papers

Developments in agricultural meteorology as a guide to its potential for the twenty-first century
W.L. Decker 9

Future directions and needs for academic education in agricultural meteorology
B.L. Blad 27

Current and future agricultural meteorology and climatology education needs of the US Extension Service
K.B. Perry 33

Future needs in agricultural meteorology: basic and applied research
J.L. Hatfield 39

The future of serving agriculture with weather/climate information and forecasting: some indications and observations
M.W. Seeley 47

Quality and variability of long term climate data relative to agriculture
R.E. Carlson, J.W. Enz and D.G. Baker 61

Spatial structure of solar radiation in Wisconsin
W.L. Bland and M.K. Clayton 75

Data quality checking for single station meteorological databases
D.W. Meek and J.L. Hatfield 85

Using climate/weather data with the NLEAP model to manage soil nitrogen
M.J. Shaffer, B.K. Wylie, R.F. Follett and P.N.S. Bartling 111

Management strategies to minimise climatic risk to wheat production in low rainfall areas of southern Australia
A.K.S. Huda 125

Guide for authors 149

VOL. 69, NOS. 3–4 JULY 1994

Research Papers

Plant responses to atmospheric CO_2 enrichment in the face of environmental constraints: a review of the past 10 years' research
K.E. Idso and S.B. Idso 153

Détermination du coefficient global de transmission de chaleur à travers la pario d'une serre
C. Kittas 205

Radiative transfer in shrub savanna sites in Niger: preliminary results from HAPEX-Sahel. 1. Modelling surface reflectance using a geometric-optical approach
J. Franklin, J. Duncan, A.R. Huete, W.J.D. van Leeuwen, X. Li and A. Begué 223

Radiative transfer in shrub savanna sites in Niger: preliminary results from HAPEX-Sahel. 2. Photosynthetically active radiation interception of the woody layer
A. Bégué, N.P. Hanan and S.D. Prince 247

Radiative transfer in shrub savanna sites in Niger: preliminary results from HAPEX-Sahel. 3. Optical dynamics and vegetation index sensitivity to biomass plant cover
W.J.D. van Leeuwen, A.R. Huete, J. Duncan and J. Franklin 267
